

Please Join us for Montessori Fits
October 19, 2017

Dinner 5:00 PM – 6:00 PM

Conference 6:00 PM - 8:00 PM

Montessori Fits is a unique opportunity for families at Lamplighter Montessori School to learn more about the Montessori Method of Education. On Thursday, October 19th, the evening begins with Boxed Dinner between 5:00 PM and 6:00 PM. The dinner is followed by a supervised night for the children. Adults will attend two forty-five minute Montessori Education workshops of their choice. The evening will conclude by 8:00 PM.

This year we have seven workshops available. Workshop descriptions are on the back of this sheet. These workshops are designed and presented by the Faculty at Lamplighter Montessori School. Each workshop session will last forty-five minutes and is limited to 12 participants. Workshops fill up fast, so turn in your reservations as soon as possible.

Please mark your choices on the attached reservation sheet, and return the attached form to order your meal, reserve your spot in the workshops, and reserve a spot in a childcare room. Individual schedules will be available at the Montessori Fits check-in desk.

Reservations should be turned in no later than Tuesday, October 17th.

Conference Workshops

Montessori Language

Toddler and Early Childhood

From the toddler's visual and perceptual learning opportunities through the advanced reading lessons in the Early Childhood programs this workshop shows the progression of vocabulary development through reading in the Montessori Toddler and Early childhood programs.

Presented by Jane Beaty (Early childhood) and Jackie Perkins (Toddler))

Montessori Practical Life

Toddler and Early Childhood

"Let me do it my way." You must have heard this from your child once or twice! Practical life is one of the important components of a Montessori classroom. It teaches independence through coordination, concentration and order. This session will help parents explore different components of Practical Life and understand its importance in the holistic development of their child.

Presented by Ligia Lavareda (Early Childhood) and Zohra Panjwani (Toddler)

Montessori Sensorial Lessons

Toddler and Early Childhood

Maria Montessori said that a child should learn by engaging all five senses. This workshop demonstrates the materials and explains the practices in the Toddler and Early Childhood curriculums that help children engage in learning through their senses.

Presented by Karen Snow (Toddler), Millie Arbona (Toddler), and Adrienne Schillace (Early Childhood)

Practical Life in the Home and for Life.

All ages

It goes without saying that the home environment is very different than the school environment. This session will help you isolate specific principles of the Montessori educational philosophy that can be incorporated into your and your child's home life. The benefits of this spill-over philosophy will be evident not only during your child's early years but also in their advanced school years.

Presented by Sharon Brandon (Lower Elementary) and Marianna Madden (Early Childhood)

Montessori Middle School: The Finale

Upper Elementary and Middle School

The Middle School experience is the culmination of the Montessori curriculum from toddler through upper elementary. Join us to learn more about the Montessori Middle School program: the structure of its interconnected curriculum, its focus on leadership skills and each student's sense of self, and how this prepares the student for life.

Terrie Sampson (Head of School) & Ashley King (Middle School)

Human Development and Sex Ed for Montessori Upper Elementary and Middle School

In this webinar the structure, content, and resources of a human growth, development, identity, and sex-education program will be introduced. This approach is centered on communication between Montessori students and their parents and teachers.

Presented by Bonney Haynes (Upper elementary) & Corinne Walker (Upper Elementary)

Assessment

All level

Three types of assessment are used to describe our students' development: mastery learning, 21st Century Skills, and, for Kindergarten through 8th grade students, the Stanford 10 Achievement Test. In this workshop each type of assessment will be defined and discussed. We will also see how the combination of all three assessments can give a picture of each student's academic, emotional, and social development.

Presented by Terrie Sampson, Head of School
